Welcome Aboard

Greetings from GCOAT

Dear Adcon Environmental Services,

Thank you for considering GCOAT for your internal app development. We specialize in creating custom software tailored to enhance your team's productivity and streamline operations. We understand the importance of a well-designed, efficient app for enhancing your team's productivity and streamlining your processes.

Our focus is to deliver a custom solution that meets your unique requirements. We provide software that is not only robust and secure but also intuitive and easy to use, ensuring that it integrates seamlessly into your existing workflows. Our goal is to develop an app that supports your company's objectives, improves operational efficiency, and fosters a more connected and productive work environment. This proposal outlines our services, pricing, and terms.

We look forward to the opportunity to collaborate and support your internal needs.

Best regards,
Amali Krigger
CEO
GCOAT, LLC

About us

The Company

GCOAT (Greatest Coders of All Time) crafts exceptional websites, mobile apps, and games with a blend of intelligence and flair. We're dedicated to creating a dynamic space where coders, creators, and innovators thrive. With our cutting-edge solutions and cool approach, we turn tech dreams into reality while keeping things stylish and fun.

Who We Are

Amali Krigger
Cheif Executive Officer

Our Mission

At GCOAT, our mission is to empower coders, creators, and innovators by crafting exceptional websites, mobile apps, and games. We are committed to blending cutting-edge technology with a dynamic, intelligent approach, creating a vibrant space where creativity and technical excellence thrive. Our goal is to turn visionary ideas into reality while fostering an environment where innovation and flair go hand in hand.

Why GCOAT

New-aged and Intuitive

GCOAT is where "Smart and Cool" meets cutting-edge technology. We design intuitive, stylish applications that blend exceptional functionality with modern aesthetics. Our goal is to create software that not only works seamlessly but also stands out with a sleek, engaging user experience.

At GCOAT, we listen to your needs and understand your goals to craft solutions that enhance efficiency and elevate your business. Our blend of technical expertise and innovative design ensures your projects are both smart and cool, driving success and making a lasting impression.

Choose GCOAT for a partner that delivers intelligent, stylish solutions that truly resonate with your users.

Our Workflow

Step 1

We start by thoroughly understanding your business, goals, and customer behaviors and expectations. This insight allows us to determine how your mobile app will integrate into your strategy. We use this information to make informed recommendations for the design and development of your custom software.

Step 2

With a clear understanding of your needs, we create and present sketches of interface layouts for 3-5 key views, including the home page, subpages, back-end templates, and any additional elements required. This step ensures we cover all aspects of your app's design.

Step 3

Once the designs are approved, we move on to development using Flutter and Dart for a smooth, cross-platform experience. AWS Amplify will be utilized to manage backend operations efficiently, ensuring your app is both robust and scalable.

Project Objective

This app streamlines job management for Admins by enabling employees to create detailed manifests for each completed service. Employees can select the service and the company it was provided for, then fill out the necessary details. The Admin can then efficiently organize, access, and review these manifests to generate invoices and streamline billing.

Expected Deliverables

IOS version of App
Android version App
Agent App, can run on phone and tablet.
Admin dashboard

Project Timeframe

10 Weeks

- Coding of User Interface (UI) App Component: 4 weeks
- Add AWS Amplify & API Development: 2 weeks
- Integration of API to UI: 2 weeks
- Testing & Debugging: 2 weeks

In case there's a need for debugging or extra development, an extra 2 weeks will be added to the timeframe.

Pricing Breakdown

Timeframe for project delivery: 10 Weeks

Design Budget: $4380

- Coding of UI (Android , Agent , IOS) : $2250
- Development of API : $1005
- Integration of API with UI : $550
- Admin Dashboard: $275
- Database modeling : $300
- $4380

Infrastructure

Maintenance Budget: $120

- Amazon Web Services Hosting: $120 yearly

(prices may increase based on App usage and data generation)

Editing

Budget: $200

Editing team will provide full-text editing of mobile app content.

They will review and make any necessary changes to spelling, grammar, sentence structure, vocabulary, and more.

Editing team will also provide textual content creation for the mobile app.

App contents include, but are not limited to, descriptions, biographies and introductory statements, and vision and mission statements.

Consultation

General Consultation

$300 (4 hours of consultations) With an additional 2 hours of complementary consultations ($450.00 Value)

- Perform initial assessments for each task before the project begins
- Assessing and analyzing business practices, procedures, and providing detailed project plan
- Determining business needs and identifying strengths, weaknesses, opportunities, and threats
- Providing guidance when issues, challenges, or problematic situations arise while constantly recommending solutions for improvements
- Tracking and assessing the effectiveness of the platform
