Welcome Aboard

Greetings from GCOAT

Dear Deshaun,

Thank you for considering GCOAT for the development of your budgeting app.

Our agency specializes in building custom mobile solutions that are smart, user-friendly, and designed to meet each companies' unique business goals. We provide software that is not only robust and secure but also intuitive and easy to use, ensuring that it integrates seamlessly into your existing workflows.

Your vision of a simple yet powerful budgeting app, featuring AI-driven budget creation, educational financial guidance, and manual budget control, is exactly the type of project we excel at delivering. We look forward to developing an app that supports your vision.

This proposal outlines our services, pricing, and terms.

We look forward to the opportunity to collaborate and support your internal needs.

Best regards,
Amali Krigger
CEO
GCOAT, LLC

About us

The Company

GCOAT (Greatest Coders of All Time) crafts exceptional websites, mobile apps, and games with a blend of intelligence and flair. We're dedicated to creating a dynamic space where coders, creators, and innovators thrive. With our cutting-edge solutions and cool approach, we turn tech dreams into reality while keeping things stylish and fun.

Who We Are

Amali Krigger
Cheif Executive Officer

Israel Dennie
Cheif Technical Officer

Our Mission

At GCOAT, our mission is to empower coders, creators, and innovators by crafting exceptional websites, mobile apps, and games. We are committed to blending cutting-edge technology with a dynamic, intelligent approach, creating a vibrant space where creativity and technical excellence thrive.

Our goal is to turn visionary ideas into reality while fostering an environment where innovation and flair go hand in hand.

Why GCOAT

New-aged and Intuitive

GCOAT is where innovation meets style. We craft sleek, intuitive applications that combine advanced functionality with standout design. With deep expertise in UI, APIs, Databases, Algorithms, Data Structures, System Design, AI and cross-platform development using Flutter, our solutions are built to perform flawlessly and look exceptional doing it.

We take the time to understand your vision, tailoring each project to enhance performance and elevate your brand. By blending technical precision with creative flair, we create software experiences that are both smart and striking.

Partner with GCOAT for solutions that are as intelligent as they are impactful.

Designed to captivate, built to deliver.

Our Workflow

Step 1

We start by learning about your business, goals, and customer behavior through collaborative workshops and open discussions. This helps us create a shared vision and a clear, prioritized backlog to guide design and development. Following Agile principles, we work in short, iterative cycles, adapting quickly to feedback and changing needs.

Step 2

With your needs defined, we create wireframes or high-fidelity mockups for key views including but not limited to the home screen, subpages, and backend templates. Short feedback cycles in each sprint validate ideas early, enabling quick adjustments and ensuring the design evolves with your goals.

Step 3

Once designs are approved, we develop using Flutter and Dart for a smooth cross-platform experience. AWS, Firebase (GCP), or the cloud solution of our choice powers the backend for scalability. Short sprints with continuous testing and regular demos ensure progress, feedback, and alignment with your vision before launch.

Our Process

1. Discovery and Requirements

Fully understand the client's business, goals, and needs in order to define clear project requirements.

2. Client Onboarding

Set the stage for a successful project by formalizing agreements, aligning expectations, and establishing a professional workflow from day one.

3. Design Process

Translate the agreed requirements into a visual blueprint of the website or app.

4. Development Process

Build the website or application according to the approved design and specified requirements.

Our Process

5. Deployment and Post-Launch

Launch the website/application to the live production environment and ensure a smooth transition.

6. Post-Launch & Training

Monitoring, analytics, client training, and documentation.

7. Ongoing Maintenance

After launch, websites and apps require maintenance to remain secure, up-to-date, and effective.

Project Objective

The goal is to build a cross-platform iOS and Android app that helps users set financial goals, create budgets manually or with AI, track income, expenses, and savings, and learn budgeting strategies. Using an EveryDollar-style approach, it organizes finances into categories with Planned, Spent, and Remaining Amount.

Expected Deliverables

- **UI/UX Design Package –** Includes wireframes, high-fidelity mockups, and Figma prototype to ensure intuitive navigation, cohesive branding, and a refined user interface.

- **Cross-Platform Mobile App –** Fully functional MVP with all core features, optimized for seamless performance and consistency across iOS and Android devices.

- **Test Builds via TestFlight and Google Play –** Internal pre-release builds for testing, feedback, and quality assurance prior to public launch.

- **Technical Documentation –** Clear, structured documentation outlining backend systems, APIs, and AI integrations for maintenance and scalability.

- **30-Day Post-Launch Support –** Ongoing assistance covering bug fixes, performance tuning, and minor enhancements following initial release.

MVP Milestones

The MVP will include all essential features needed for a simple, intuitive, and goal-focused budgeting experience, combining core budgeting tools with AI assistance, transaction tracking, and insightful dashboards.

Feature Category	Specific Features
User Authentication & Accounts	Email & password login, secure account management (password reset, profile update)
Onboarding Flow	Splash screen, guided onboarding explaining core features, initial setup for currency, categories, and financial goals
Budget Management	Manual budget creation (income, expense categories, set amounts), AI Budget creator chatbot for goal-based budget generation, dynamic budget adjustments via AI, monthly budget tracking, budget reset option

MVP Milestones

Feature Category	Specific Features
Transactions	Manual transaction entry (amount, category, date, notes), transactions list with filters (category/date), speech-to-text transaction input
Dashboard & Insights	Total income summary, total expenses summary, remaining balance (savings), total transactions count, per category spending totals, visual chart for planned, spent, and remaining money
AI Budget Assistant	Generates and adjusts budgets, Provides budgeting tips & education (e.g., 50/30/20 rule), Responds to “what-if” financial scenarios
Compliance & Support	Contact/help center page, Terms & Conditions, Privacy Policy

Project Timeframe

24-48 Weeks (Flexible Timeline)

- Target MVP Date: May 1, 2026 (+/- 6 months).
- Start Date: November 1, 2025.

Month	Phase
1	Wireframes & UX/UI
2	Coding of UI
3	Coding App Backend
4	Integration of Backend To UI
5	Testing & Debugging
6	Deployment & Post Launch Support

Pricing Breakdown

Design Budget: $6000

Phase	Price
Wireframes & UX/UI	$1000
Coding of UI	$1000
Coding App Backend	$1000
Integration of Backend To UI	$1000
Testing & Debugging	$1000
Deployment & Post Launch Support	$1000
Total	**$6000**

Onboarding

Onboarding Fee

$1000

- **Secures Your Project Start Date:** Reserves development time in our schedule so work begins on time without delays.
- **Covers Discovery & Design Foundation:** Funds the initial UX/UI design phase, including wireframes, mockups, and prototypes that set the blueprint for the entire app.
- **Ensures Aligned Vision:** Allows us to finalize visual direction, brand styling, and core user flows before any coding begins.
- **Reduces Risk of Costly Changes:** A complete, approved design minimizes revisions during development, saving time and money.
- **Kickstarts Technical Planning:** Supports early prototyping, backend, database, and AI integration planning & implementation to ensure smooth development.

Infrastructure

Maintenance Budget: $200

- Cloud Hosting (yearly)

(prices may increase/decrease based on App usage and data generation)

Editing

Budget: $500

Editing team will provide full-text editing of mobile app content.

They will review and make any necessary changes to spelling, grammar, sentence structure, vocabulary, and more.

Editing team will also provide textual content creation for the mobile app.

App contents include, but are not limited to, descriptions, biographies and introductory statements, and vision and mission statements.

This will also include any app content required to be set for production whihc includes, but is not limited to pictures, logos, media, data, etc.

Consultation

General Consultation

$300 (4 hours of consultations) With an additional 2 hours of complementary consultations ($450.00 Value)

- Perform initial assessments for each task before the project begins
- Assessing and analyzing business practices, procedures, and providing detailed project plan
- Determining business needs and identifying strengths, weaknesses, opportunities, and threats
- Providing guidance when issues, challenges, or problematic situations arise while constantly recommending solutions for improvements
- Tracking and assessing the effectiveness of the platform

Equity

Equity Option

As part of our flexible partnership approach, GCOAT offers an equity-based option to reduce upfront development costs.

- If the client agrees to provide 10% equity ownership in the app and/or company, $1000 will be deducted from the total project cost.

- If the 10% equity option is declined, GCOAT requests consideration of a 5% equity stake in the app/company as part of the long-term collaboration.

This equity option aligns our interests in the app's success and creates a mutually beneficial partnership beyond the initial development phase.

Flexible Budget & Timeline Management

If additional debugging or development is required, the project timeframe may be extended by 1 to 6 months. Monthly fees are flexible, ranging from $500 to $1,000, depending on the agreed workload. For any extra development beyond the planned scope, a cap of $0 to $500 will be set to ensure budget control.
